

## Hazardous Waste Fees

### Notification Fees

Small Quantity and Large Quantity Generators submitting a new notification under Part 99 of the hazardous waste regulations (6 CCR 1007-3) must submit a notification fee with their Colorado Hazardous Waste Notification form. **The notification fee is ~~\$120~~ \$84\***. Persons submitting a subsequent notification that downgrades their hazardous waste notification status (for example, from a Large Quantity Generator to a Small Quantity Generator) must also submit the notification fee with their updated form. Subsequent notifications that are providing or updating other information (for example, contact name change) will not be assessed any fee unless they are also downgrading their notification status. Persons submitting a subsequent notification that upgrades their notification status will not be assessed the notification fee. For more information on the applicability of the fee with respect to notification changes, refer to the EPA Identification Number Compliance Bulletin. To notify or to update your notification, please use the Colorado Hazardous Waste Notification Form. Both are available on our website at [www.colorado.gov/cdphe/hm](http://www.colorado.gov/cdphe/hm).

When applicable, the notification fee MUST accompany the completed and signed notification form. The Department will not process the notification form without the notification fee. Make checks payable to: CDPHE or Colorado Department of Public Health and Environment. Call (303) 692-2130 for credit card payments – be sure to specify your Site Name as it appears on your notification form and that you are paying the “Haz Waste Notification Fee.” The completed notification form should then be submitted to the Department along with a note that you paid the notification fee by credit card.

### Notification Requirement for Conditionally Exempt Generators

Conditionally Exempt Small Quantity Generators that generate three (3) or more gallons per calendar year of hazardous waste codes F001, F002, F004 and/or F005 (halogenated and non-halogenated solvents) are required to notify the Department under Part 99 of the Colorado Hazardous Waste Regulations (6 CCR 1007-3) and obtain an EPA identification number. However, they will not be required to pay the notification fee discussed above.

### Annual Fees

There are also annual Hazardous Waste Commission fees and Generator fees associated with the notification process. Facilities will be billed annually by the Department for the Generator and Hazardous Waste Commission fees. DO NOT submit the Commission or Generator fee with the notification form unless told to do so by the Department.

Facility Type	Generator Fee	Commission Fee	Notification Fee
Conditionally Exempt Small Quantity Generators (generate three (3) gallons or more of hazardous waste codes F001, F002, F004 and/or F005 per calendar year)	<del>\$200</del> \$140*	N/A	
Small Quantity Generators	<del>\$625</del> \$440*	\$ 65	
Large Quantity Generators	<del>\$3200</del> \$2240*	\$210	
Transporters	N/A	\$ 70	
Non-commercial treatment, storage or disposal facilities	N/A	\$400	
Commercial treatment, storage or disposal facilities	N/A	\$600	
New Notification Fee/Subsequent Notification Fee (downgrading status)			<del>\$120</del> \$84*

***\*Temporary fee reduction for calendar year 2013***
